

METHOD AND SYSTEM FOR SERVING SOFTWARE APPLICATIONS TO CLIENT COMPUTERS

ABSTRACT OF THE DISCLOSURE

A method and system for serving software applications to remote clients across

5 the internet, for example, is disclosed that preferably utilizes standard, SMB (server message block), protocols, which are available in commercial operating systems. Further, an associated business method is described in which subscribing institutions can out-source the application serving to a third party institution, transparently. Finally, a port proxy system is provided that enables tunneling through firewalls that are

10 configured to block communications from SMB ports.
